

HEALTH COMMITTEE

Dear Visitor,

Here you can learn about the work of the Health Committee, which I have the honour to chair.

By constitutional commitment, our task is to monitor health policy and the National Health Service (SNS). We oversee the sectors within the remit of the Ministry of Health, that is, those relating to access to and quality of care, the National Health Plan, medicines policy, hospitals and hospital management, drug addiction, public health and health research, and the funding of the SNS and its relationship with the social and private sectors.

Since we are well aware of the importance of this work, because it concerns one of the truly fundamental pillars of the life of citizens, we have created here a space for sharing relevant information about what the Health Committee does. We hope it is useful and that everyone will contribute to it.

I am sure that we will do our work better thanks to this space, which can enable a closer dialogue with people. After all, it is the purpose of the members of this Committee to serve the Portuguese in the area of health, and in all political activity.

Thank you for your attention.
José Matos Rosa
